-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

As noted by Applicant in the response of 11 February 2005, claim 11 appears to be the generic claim intended by the previous examiner in the requirement for election of species.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11, 20, 39-49, and 51-63 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In each of the independent claims, the "segregated" quantum structure is not clear. The term "segregated" would seem to imply a process of making, where something, a structure for example, segregates out or separates from a matrix. But the specification states at page 1, paragraphs 0004 and 0005, that the term "segregated quantum structure" is synonymous with quantum dot. "Quantum dot" is understood as a simple structural description, where the structure could be made by any number of ways, some not including any segregation step(s). So "segregated" could mean simply "physically distinct," in the sense that a quantum dot structure could be identified as a structure distinct from its surroundings. So it is not clear whether the claim limitation "segregated quantum structure" refers to a structure having the properties of a quantum

dot, which is made by a segregation process, or whether the claim limitation "segregated quantum structure" is intended to encompass *any* structure having quantum dot properties, no matter how it is made. Clarification is needed.
